

PROFILE SUMMARY

Web Developer with hands-on experience building and deploying production-level applications. Proven ability to handle end-to-end development, including frontend, backend, and cloud deployment. Strong problem-solving mindset with experience resolving production issues and improving system reliability.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), ReactJs, NextJs, React Router, Redux Toolkit

UI & Styling: Tailwind CSS, Bootstrap, Recharts (Data Visualization), Framer Motion

Backend: Python, FastAPI, Node.js, Strapi

Testing: Unit Test Case (Jest)

Deployments : Netlify, DigitalOcean (VPS), Cloudflare, PM2, Nginx and Git & GitHub.

EXPERIENCE

Springgreen | Fullstack Developer (intern) | Jan 2026 - Mar 2026

- Contributed to the development, optimization, and deployment of three production level applications: Slow Motor Rides, CA flow and Vihas furnitures.
- Built and enhanced critical business modules including invoice automation, payment gateway (Razorpay) integration with webhook handling.
- Deployed and maintained production environments using PM2, Nginx, DigitalOcean, and Cloudflare, resolving server-level issues and ensuring high availability, stability.
- Collaborated directly with clients to understand requirements, translate business needs into technical solutions, and implement high-quality feature enhancements.

PROJECTS

CA Flow Board (Task + Billing System)

- Developed and enhanced invoice and billing system with GST handling, recurring invoice logic and Task management modules, improving operational workflow.
- Integrated Razorpay payment gateway with webhook validation.
- Optimized email/SMS notifications and MongoDB queries, reducing manual effort.

Vihas Furniture (E-commerce Platform)

- Optimized cart operations and Optimized MongoDB queries, reducing API response time by ~30% and Reduced products loading time.
- Enhanced and stabilized authentication system (login/signup) with improved validation and error handling.

Rithvika Digital Marketing Agency

- Engineered a high-converting digital agency platform to solve client lead-generation bottlenecks, seamlessly integrating secure, backend-less data capture via EmailJS.
- Architected an industry-leading, premium UI/UX ecosystem by designing complex, interactive components (orbital timelines, auto-looping carousels) with Framer Motion

EDUCATION

B.Sc. Computer Science - AVS Arts & Science College, Salem - **2022 - 2025**
